Vietnamese: Native
French: Elementary / A2

PROUD OF

1st TAPC
Competitive programming 2022

1st Math Olympiad
Regional round (last in this category) in 2015

INTRO

I am a motivated and passionate Computer Scientist and Mathematician. I like structured methodologies but also love to adapt a more creative way to find solutions to problems. Between "do" and "don't," I always pick "do."

I am so excited to begin my journey to understand the thing that makes human such incredible beings, our brain. And to explore the potential of neuromorphic computing to advance artificial intelligence.

WORK EXPERIENCE

Software Developer, Internship | Digitoo s.r.o

November 2023 – Current | Prague, Czech republic

- Developing application using NextJS framework
- Facilitating seamless data migration and proficiently navigating CMS structures to ensure optimal system performance
